Security Inks

Security inks offer manufacturers and consumers greater confidence by protecting them from piracy and product tampering. Governments can combat fraud and counterfeiting by incorporating our security inks into official travel documents, currency, and tax stamps or labels.

INK ADVANTAGES

Versatility - Prints on offset and coated stock without optical brighteners.

Multiple technologies - Can be used with TIJ, piezo, and CIJ inkjet printing systems.

Compliant - Meet increasingly stringent government and industry standards.

In addition to our standard inkjet inks, Kao creates custom formulations to meet specific printing requirements. We also offer private-label and contract manufacturing services.

INVISIBLE AND FLUORESCENT INKS

The need to prevent fraud and meet government consumer safety regulations drives increasing interest in these aqueous inks.

SECURITY INK TYPES

- Invisible fluorescent ink
- Visible fluorescent ink
- Ultraviolet invisible ink
- IR invisible ink
- UV longwave and shortwave ink
- Lightfast and non-lightfast ink

TAGGANT INKS

The ink features a high-end security pigment that provides “lock-and-key” functionality when combined with a detection system matched to the ink.
